

LIVING LARGE

Sprawled on two wooded acres in Langley, this spacious indoor/outdoor custom home, built by Homestar Building Corporation, is a luxurious private sanctuary with country club ambiance, perfect for convivial gatherings of friends and creating warm memories during family visits.

The sweeping exterior space flows from the house through outside NanaWalls (one is 18 feet and the other 12) to a large covered outdoor living/dining area with post-and-beam skylight, patio heaters, fire table and hot tub with wall-mount TV. Cook and prep space extends from the kitchen windows onto the stone counters and inset BBQ of the outdoor workspace.

Just beyond is a swimming pool, strategically placed for the sunniest exposure. With a natural hardscaped waterfall, diving rocks and carved stone waterslide, it's the centrepiece of the outdoor activities area. A free-standing stone pizza oven and conversation circle, a second hot tub and a pool house aligned with the style of the main house complete the poolside experience. "To top it all off," says designer Sarah Gallop of Sarah Gallop Design Inc., "a downstairs entertainment room opens onto a landscaped putting green."

Homestar Building Corporation's grand custom build offers everything necessary for outdoor living, from pizza oven to putting green.
